

Information Centric Architecture in IoT

(a) Three storied building and in each floor there are two apartments.

(b) The background hardware of the building management system which includes embedded devices (nucleo-f401 board with an extension shield).

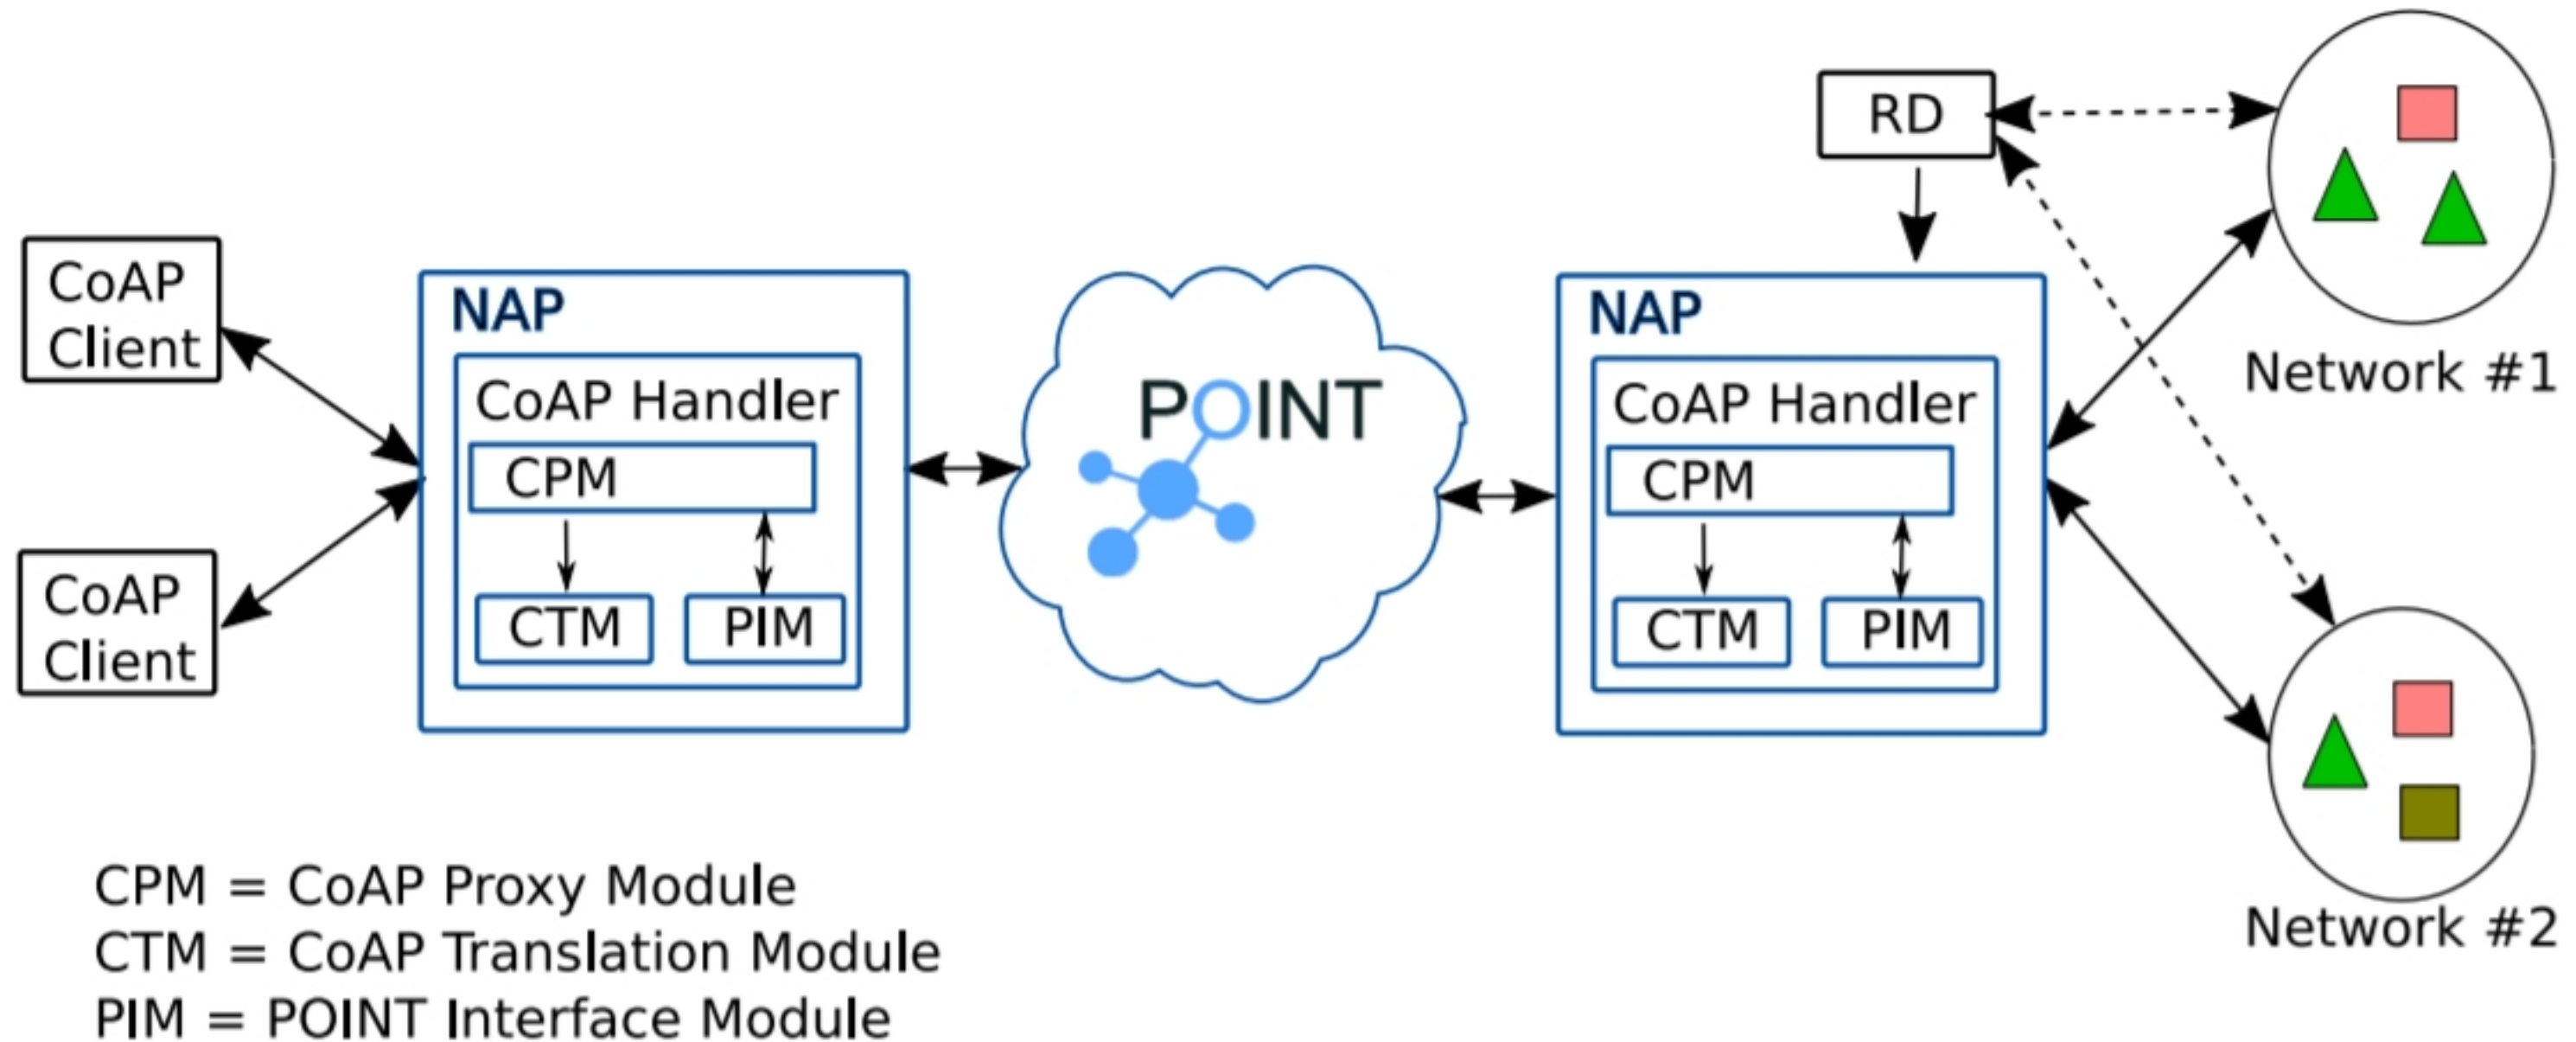

Figure 4.1. An example of CoAP over ICN reference architecture. On the right there are Things offering resources. Each resource is specified by a color and also by shape. On the left there are the CoAP clients. (PUBLICATION IV) ©[2015] IEEE.
